

Software Developer / DevOps / 25-35k DOE

Malvern Hills Science Park

BTC Solutions is currently looking for a Software Developer with strong Web and DevOps skills for our Malvern office.

Working within our fresh and agile development team on multiple and varied projects in a culture that encourages creativity, fun, and new ideas, you will be responsible for design and implementation of high quality software that directly furthers the business. Working on day to day enhancements and new features you will also assist in the implementation of initiatives to drive productivity and efficiency as well as the opportunity to experience many technologies from mobile and web development to multi-tiered application design and developing scalable service orientated solutions.

Skills and requirements we are looking for:

- Excellent analytical and problem solving skills with ability to develop elegant solutions
- Experience developing web-based and client / server software with scalable architectures
- Strong knowledge of JavaScript, JQuery, HTML, CSS and ideally Angular.JS
- Experience with .Net (C#), Web Services and WebAPI2 is advantageous
- Familiarity with agile development methodology and Source Control tools (Mercurial/Kiln)
- Full stack / full development-lifecycle experience an advantage
- Thirst for knowledge and ability to rapidly understand new technologies
- Ability to work both individually and as part of a team
- Cross platform (e.g. Xamarin), Mobile, Cloud (e.g. AWS) development and modern web technologies an advantage

In return the successful candidate will enjoy:

- Competitive annual salary and benefits commensurate with experience
- Working in a challenging and enjoyable environment
- Reporting to a technically able manager
- Career Development opportunities
- Flexibility around core hours
- Cycle to Work Scheme
- MediCash Scheme
- Discretionary bonus
- Subscription to Pluralsight and continual learning and development within a collaborative team passionate about technology

Over the last six years BTC Solutions have developed Europe's leading automotive electronic vehicle health check system, with over 1000 dealerships using our software globally and brand approvals from leading manufacturers such as Jaguar Land Rover, Ford, Vauxhall, Peugeot, Citroen, Kia and Hyundai. With huge increase in our user base over the next twelve months we need talented software developers to deal with this exciting growth of our business.
