# Vacancy for Assembler

Xoptix is a manufacturer of particle size monitoring instruments.

We have a vacancy for a permanent full-time assembler to work in production at our offices on the Malvern Hills Science Park.

Training will be given on all aspects of the role which includes assembling of small component parts, testing and packing.

The work is carried out in a clean and tidy environment and attention to detail is required.

You will need basic computer skills (i.e. be familiar with a windows-based operating system and its associated applications), be dextrous and able to stand and work at high work tops.

The standard working week is 37.5 hours (but may be negotiable) and you will be entitled to 20 days annual leave.

Pay negotiable based on experience.

Please apply / send your CV to:
